

SIMPLIFYING COMPLIANCE: THE BENEFITS OF THE PEFC EUDR DDS

The PEFC EUDR Due Diligence System (DDS) supports PEFC chain of custody certified companies in demonstrating their compliance with the European Union Regulation on Deforestation Free Products (EUDR). Discover why the PEFC EUDR DDS is the right choice for your business.

SIMPLIFIED IMPLEMENTATION

The PEFC EUDR DDS simplifies complex EUDR requirements by translating them into clear, understandable steps, using the familiar language of the PEFC Chain of Custody standard.

ASSURED COMPLIANCE

Independent third-party certification provides robust quality assurance, with expert auditors verifying your PEFC EUDR DDS compliance, giving you confidence that you are implementing its requirements correctly.

STREAMLINED DATA MANAGEMENT

The PEFC EUDR DDS module guides you on how to collect, record, and share the required data, making it easier for you to comply with key EUDR data requirements.

FULL FLEXIBILITY

The system allows you to choose which of your products will undergo the PEFC EUDR DDS and which go through the regular PEFC Chain of Custody DDS, making it highly adaptable to your diverse business needs.

SECURE AND SEAMLESS DATA SHARING

The system can integrate with PEFC software partners for secure geolocation data management, simplifying complex data sharing requirements.

EU ACKNOWLEDGEMENT

Certification is recognised by the EU as a valuable tool for risk assessment under the EUDR, giving you the confidence that opting for PEFC certification for your EUDR compliance is the right choice.

DEMONSTRATE YOUR EUDR READINESS

Implementing the PEFC EUDR DDS signals to the market and your customers that your company is aligned with EUDR requirements, enhancing your credibility and customer trust.

WORLDWIDE APPLICATION

The PEFC EUDR DDS is applicable worldwide by any organisation within the supply chain, facilitating the sharing of EUDR data and information across borders for companies inside and outside the EU.

COMPETITIVE ADVANTAGE

Offering PEFC EUDR certified materials gives you a competitive edge by streamlining the compliance process for your customers. It simplifies their risk assessment as material delivered under a PEFC-EUDR claim can be considered as negligible risk.

VERSATILITY FOR CUSTOMERS

PEFC EUDR certified materials are also considered as negligible risk within the regular PEFC Chain of Custody DDS. This allows your customers to choose which DDS best fits their needs, helping you and all downstream companies to effectively cater for a diverse global market.

FUTURE-PROOF COMPLIANCE

The PEFC system provides comprehensive certification solutions that evolve with new regulations and stakeholder needs (chain of custody, RED II, EUDR), ensuring ongoing compliance and readiness for future demands.
